## API

---

### Working with the OpenGov NSW API

OpenGov NSW data and functionality are available via an open web API. This service provides additional options for agencies wishing to integrate OpenGov NSW with their own websites. It also means that external developers, and members of the public more broadly, can easily extract and use OpenGov NSW data.

Please note that OpenGov NSW content is licensed Attribution (CC BY) under the Creative Commons licensing system, unless otherwise indicated. Copyright resides with the State of New South Wales unless otherwise indicated.

The OpenGov NSW web API is being actively developed. Unfortunately this does mean that it may change over the coming months. On the positive side, we will be very receptive, and grateful, for any feedback or suggestions for improvements: [opengov@records.nsw.gov.au](mailto:opengov@records.nsw.gov.au)

### Search for publications

<https://www.opengov.nsw.gov.au/search.xml?query=query+term>

Returns search results in the OpenSearch XML format (<http://www.opensearch.org>)

### List all publications

<https://www.opengov.nsw.gov.au/publication.json>

Returns a JSON list of all publications on the site.

Information about publications comprises descriptive metadata and a list of publication files. Publication files are the sequence of files that make up a publication: while many publications are associated with just one file, others, including annual reports published in separate parts, have multiple files.

For example:

```
{
  "ID": 11305,
  "Title": "NSW Department of Commerce Annual Report 2007/08",
  "Agencies": [
    "NSW Department of Commerce"
  ],
  "Type": "Annual Report",
  "Date": "2008",
  "Publishers": [],
```
